Standard Operating Procedures

| SPRING 2026 EDITION

Effective May 2, 2026 · Owner: April Gauthier, Supervisor, Eastern Washington

> Team — these are the standards we operate by every day. Read through, ask questions, and bring them with you to every store. Consistent execution is what makes the work look easy.

Daily Supplies

Bring these every day. If you're missing one, grab it from your kit before heading out.

Pen	**Highlighter**	**Permanent Marker** *dark-colored*	**Scissors**
Tape Measure	**Step Stool** *if needed*	**Knee Pads** *optional but useful*	**Anything Else** *your kit needs*

Arrival & Setup

A clean start sets the tone. Two phases — get clocked in, then gather what you need before stepping on the floor.

1 Get Clocked In

Arrive early enough to:

- Enter the building
- Check in with your Team Lead
- Be clocked in **by your scheduled start time**

2 Gather Your Setup

Before heading to your assigned set:

- Shopping cart
- Trash bag
- Cleaning supplies

Reset Procedures

The full reset workflow — from verification through cleanup. Each phase has its own standards. Don't skip ahead.

PHASE 1 · PRE-RESET

Verify Before You Touch a Shelf

- Verify you are working on the **correct set and location** — ask your Team Lead if unsure.
- Review the **POG and Kompass notes** before starting.
- Pull all discontinued items (*"disco"* items).

PHASE 2 · DURING RESET

Execute the Set

- Remove old shelf strips and install new strips as needed (you may not receive strips for the entire set).
- **Measure shelf heights on every set, every time.**
- Clean while resetting:
  - **Full Updates** — clean all shelves
  - **NII / Maintenance Sets** — clean open shelving only
- Reset products per the POG, keeping the old tag with the product when moving items.
- Set the correct number of facings.

PHASE 3 · TAG PLACEMENT

The Tag Travels With the Product

- **Critical:** at every stage of the reset, the tag travels with the product.
- When moved to the shelf, place the tag flat on the **LEFT side of the strip**, covering the printed product info underneath.
- Replace the tag **only if the new tag has a newer date**. If not, leave the old tag in place.

PHASE 4 · POST-RESET

Close It Out Cleanly

- Label and store all **Not in Set / Backstock** items correctly.
- Check the Kompass cart for new items.
- Clean the area: trash in bags, cardboard disposed of properly.
- On the POG, **highlight any items missing tags**.
- Return the highlighted POG to your Team Lead, who will pass it to the price changer to have the missing tags made.
- **Major issues** → report to the Team Lead immediately. They'll raise concerns to the Supervisor.
- **Minor issues** → communicate when returning the POG to the Team Lead.

Electronics & Personal Devices

Stay focused, stay accessible. The store floor is a customer-facing space.

NOT ALLOWED

- Music-playing devices on the sales floor
- Earbuds or headphones on the sales floor
- Personal cell phone use during work

CELL PHONE RULES

- Keep phones on **silent** at all times
- Use only for **business purposes**
- Never while moving product on the floor

Workplace Expectations

PROFESSIONALISM

- Maintain professional language and appropriate workplace conversations at all times.

KEEPING AISLES SHOPPABLE

- If using multiple carts, move carts that aren't actively being worked to nearby aisles or main walkways.
- **Always leave space for customers.**

CUSTOMER ASSISTANCE

- Help when able.
- If unable, politely find a Fred Meyer associate to assist.

FOOD, DRINK & TOBACCO

- No eating or drinking on the sales floor or in the backroom.
- No tobacco use on Fred Meyer property — including smokeless tobacco.
